AI interactive Your O book publishing App...

AI interactive books an online platform to create digital flip- interactive books with the power of AI. A simple to use dashboard that guides you to create your own digital bestseller book.

Very useful tutorials on how to create each type of digital book & a section to capture leads from readers when they read your book. There are plenty of templates to create covers/layouts for your digital books & you can even create photo books with your favourite images for friends and family.

There is an editor for personalising the AI generated text if you wish and an editor for personalisation if the graphics templates.

Overall an application that is a great introduction to the world of digital book creation & how to get your masterpiece out into the world by using the interactive options in the app to share your work on social media, publish on Amazon, you can even password protection the content if you so wish, give out automatically generated QR codes to share the book easily.

You can take existing ebooks & convert to flip & interactive books as well.

With evolving technology, updates & refinement on the text / graphics editor this has great potential to get even better.

A well worth investment if you want to get into the world of digital book creation.

eBooks saves time and is great

I recently had the opportunity to use the AInteractiveBooks eBook generator and I must say that my experience has been excellent. The platform is very intuitive, allowing me to create a professional eBook in no time. What I liked most was the possibility to fully customize the design, from the covers to the typography, allowing me to create a work that exactly reflected my vision.

In addition, the navigation function within the eBook is clear and simple, which significantly improves the reading experience for users. I was also impressed with how fast it was to generate the final file, ready to be shared or published.

Without a doubt, this generator is an essential tool for any author or content creator who wants to launch an eBook without technical complications.

ANYONE CAN MAKE MONEY PUBLISHING A.I KIDS BOOKS

How much do you realistically make as an A.I Kids Book Publisher

Here's a realistic earning breakdown for an AI-powered kids book publisher (self-publishing via Amazon KDP or similar platforms):

Realistic Monthly Earnings (Based on Volume + Effort)
